Cindy - See below for sample IDs. She also mentions what analysis Region 8 is performing but no mention of ORD/Ada.

So, what's the soonest we can have the glycol results for these 3 samples? I've attached the Chain of Custody form from your previous email. Thanks, John

In Dimock, we collected samples from three wells during our Fall sampling round:

two well locations at the Ex. 6 - Personal Privacy residence. The sampling IDs are Ex. 6 - Personal Privacy Ex. 6 - Personal Privacy  
Ex. 6 - Personal Privacy one well location at the Ex. 6 - Personal Privacy residence. The sampling ID is Ex. 6 - Personal Privacy

The well IDs apply for both labs

The Region 3 lab analytes are:

Diethylene glycol  
Triethylene glycol  
Tetraethylene glycol  
2-butoxyethanol

Region 8 is conducting DRO, GRO, and SVOC analyses.

At the staff level, the lab contact at the Region 3 lab is Kevin Martin and the lab contact at the Region 8 lab is Jesse Kiernan.

We are working to get in contact with the folks in region 8 who can accelerate their work.

Bob - Thanks.

Jeanne & Bob - Could you provide us with the information for the two Dimock samples that are in Ft. Meade, and also provide that information to the two other labs.

Thank you - Shawn

Subject: ORD Study Samples

Bob - I looked into the issue raised today regarding the ORD samples being done in Dimock. The Region III lab at Ft. Meade is one of three labs that are doing sample analysis. We have 54 samples that we are testing just for glycol. The results are scheduled to be done by Jan. 6th per the 60 day agreement we have with ORD. The other two labs are looking at metals and organics (I think). The samples we have are identified by a number and a County. I can look to expedite the Dimock samples if we can found out which sample they are.

Thanks - Shawn
